

Hospitality churns most, but its hiring is backfill

Hospitality quits at ~5X the government rate

Every vertical hires at replacement level, none is expanding faster

Hospitality lost ~18X its normal monthly headcount in the 2020 shock

Fewer people are quitting, and most who leave weren't quitting anyway

More job openings means more people leaving — everywhere except professional services

Openings Rate and Quits Rate by YearMonth and Period

Manufacturing

Government

Leisure and Hospitality

All four verticals have returned to or below their 2018–19 level

● Quits Rate ● Baseline Quits

In professional services, most departures are employer-initiated, retention spend does not reach them

● Involuntary Share ● Other Share ● Voluntary Share

Downside and baseline assumptions for the 2027 plan

Severe but short, every vertical was back to normal within two to five months

Every vertical returned to normal within 8 months. Model a one-to-two quarter cash gap, not a permanent loss of market.

2020 Shock: Size And Duration By Vertical

Industry	2019 Base Line	2020 Peak	Layoff Shock Multiple	Recovery Date	Months to recover
Professional and business services	1.98	6.40	3.24	01 Jun 2020	2
Manufacturing	0.85	6.30	7.41	01 Aug 2020	4
Leisure and hospitality	1.78	31.90	17.97	01 Aug 2020	5
Government	0.47	1.20	2.57	01 Dec 2020	8

2027 Assumption for Quits Rate

Base case: use 2024 average quits per vertical

Government	Leisure and hospitality	Manufacturing	Professional and business services
0.81	3.93	1.61	2.43

Where quitting sits today compared with before the pandemic
